

# Why RailLog Korea?

## Busan – hub city of transportation and logistics in Northeast Asia

RailLog Korea presents great growth potential, thanks to the geographical benefits of Busan where the fair takes place, as the very starting point and final destination of the Trans-Asian Railway (TAR) network. In addition, Busan is a hub city where all logistics functions, including railroad, port, air and highway are integrated, aiming to be the logistics hub in Northeast Asia.

## Major Investment from the Korean government

The Korean government is planning to invest 130 billion won (US\$121 million) from 2020 to 2026 to boost the country's railway vehicle parts industry. In particular, they plan to replace old rolling stock between 2020 – 2024. In addition, aiming for an era of green transportation, central and local governments are promoting the construction/ expansion of railways and subways, and eco-friendly alternatives to road transportation.

## A trusted venue for the railway business

RailLog Korea is a well-established, trusted convergence point for the railway business where the most advanced technologies from global players are presented, from parts and components to rolling stock and railway logistics. The fair also provides an insight into the region's railway business with plentiful fringe events covering a comprehensive range of topics.

## A widespread network and industry expertise

Jointly organised by Messe Frankfurt and BEXCO, both of which are armed with years of experience in organising trade fairs and have an extensive global network, RailLog Korea provides genuine access to the rapidly growing Korean and Asian railway market.

# RailLog Korea: your express ticket to Asia’s rail and logistics industry

RailLog Korea, Asia’s foremost business and networking platform for railway technology, as well as the infrastructure and logistics industries, takes place biennially in Busan, South Korea.

Attracting some of the biggest names in the business, the fair covers the full scope of the industry, from parts and components to rolling stock as well as logistics.

“ In spite of the pandemic, RailLog Korea 2021 was a huge success! We appreciated the networking opportunities as well as the innovations and inspiration that we found at the exhibition. ”

Mr Dirk-Oliver Lukat,  
Chairperson,  
European Chamber of Commerce in Korea

## Facts & Figures 2021

95 exhibitors  
21,484 visitors  
17,672 sqm exhibition space

## 2021 Show highlights

### Rolling stock models & railway vehicles on display

In addition to parts and components, rolling stock models and railway carriages were presented at the fairground in 2021, attracting a wide range of industry players and media as well as the general public.

### Spring Conference of The Korean Society for Railway

Numerous experts including academics and industry leaders conducted seminars and visited the fairground to discuss the latest topics and trends.

## Exhibit group

### Railway technology

Railway vehicles for public and freight transport, subassemblies & vehicle components, maintenance, traffic management systems and more.

### Interiors

Interior fittings, vehicle equipment, finishings and more.

### Infrastructure

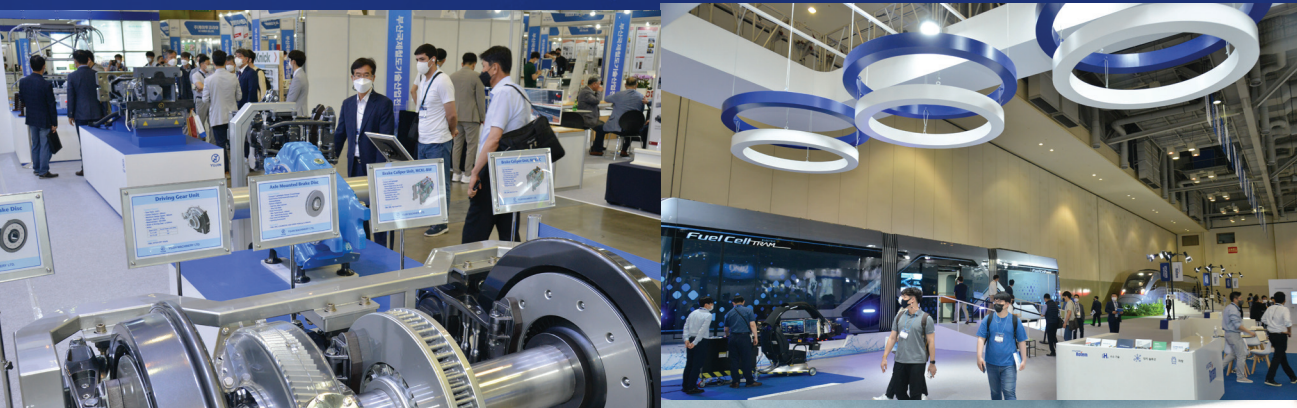

Railway infrastructure and construction, track machinery and equipment, signaling & control systems, station facilities and equipment, tunnel construction & maintenance and more.

### Transport IT & logistics

Transport management, freight traffic logistics, supply chain management, materials handling, distribution, storage & warehousing and more.

### Others

Consulting, institutions, associations, media, railroad travel & catering services and more.

“ RailLog Korea has demonstrated that railway and related technologies in Korea are gradually reaching the highest standards. The show has established itself as a bridge to promote the country’s excellent railway technology to the world. ”

Mr Keum Changsun,  
Director of the Public Relations Department,  
SR
