Why RailLog Korea?

Busan – hub city of transportation and logistics in Northeast Asia

Busan presents great growth potential thanks to its geographical benefits, where the fair takes place, as the very starting point and final destination of the Trans-Asian Railway (TAR) network. In addition, Busan is a hub city where all logistics functions, including seaport, port, air and highway are integrated, aiming to be the logistics hub in Northeast Asia.

Major Investment from the Korean government

The Korean government is planning to invest 130 billion won (US$121 million) from 2020 to 2026 to boost the country’s railway vehicle parts industry. In particular, they plan to replace old rolling stock between 2020 – 2024. In addition, aiming for an age of green transportation, central and local governments are promoting the construction/ expansion of railways and highways and eco-friendly alternatives to road transportation.

A trusted venue for the railway business

RailLog Korea is a well-established, trusted venue for the railway business, where the most advanced technologies from global players are presented, from parts and components to rolling stock and railway logistics. The fair also provides an insight into the region’s railway business with plentiful fringe events covering a comprehensive range of topics.

A widespread network and industry expertise

Jointly organised by Messe Frankfurt and BEXCO, both of which are armed with years of experience in organising trade fairs and exhibitions, RailLog Korea provides genuine access to the rapidly growing Korean and Asian railway markets.

Subject to change, information as of September 2022
RailLog Korea, one of the foremost business and networking platforms for railway technology, as well as the infrastructure and logistics industries, takes place biennially in Busan, South Korea.

Attracting some of the biggest names in the business, the fair covers the full scope of the industry, from parts and components to rolling stock as well as logistics.

“Despite the pandemic, RailLog Korea 2021 was a huge success! We appreciated the networking opportunities as well as the innovations and inspiration that we found at the exhibition.”

Mr. Dirk-Oliver Lukat, President, European Chamber of Commerce in Korea

Facts & Figures 2021
95 exhibitors

2021 Show highlights
Rolling stock models & railway vehicles on display
In addition to parts and components, rolling stock models and railway carriages were presented at the fairground in 2021, attracting a wide range of industry players and media as well as the general public.

Spring Conference of The Korean Society for Railway
Numerous experts including academics and industry leaders conducted seminars and visited the fairground to discuss the latest topics and trends.

“RailLog Korea has demonstrated that railway and related technologies in Korea are gradually reaching the highest standards. The show has established itself as a bridge to promote the country’s excellent railway technology to the world.”

Mr. Keum Changsun, Director of the Public Relations Department, SR
